Restriction to one of the following inventions is required under 35 U.S.C. 121:

 Claims 1-3, 8, drawn to a process of preparing what-based snack, classified in class 426, subclass 549.

II. Claims 4-7, **Q**-11, drawn to a process of preparing potato snack, classified in class 426, subclass 637.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. The process of Invention I comprises different processing steps from the process of Invention II. The two groups are directed to independent inventions.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II or vice versa, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
